HYDRA-NEB™
SALINE SOLUTION 0.9% w/v

Isotonic solution for inhalation (0.9% NaCl).
Sterile solution in a unit-dose vial for
humidifying the airways. Not for injection.

Hydra-Neb (0.9% NaCl) isotonic solution for inhalation is suitable for all ages and can thus be administered to young children.

Hydra-Neb (0.9% NaCl) isotonic solution for inhalation is highly compatible with human body fluids and ensures sufficient humidification of the respiratory mucosa, thus avoiding an unpleasant sensation of dryness. This process helps the airways' natural cleaning mechanisms, which is of benefit in cases of inflammation or pollution exposure or following the inhalation of dust or smoke.

This type of therapy may be used when experiencing flu-like symptoms, colds and coughs.

Hydra-Neb (0.9% NaCl) isotonic solution for inhalation may also be used where the humidity of the ambient air is low or after long exposure to an air-conditioned or heated environment.

Hydra-Neb (0.9% NaCl) isotonic solution for inhalation is indicated for the humidification of the upper and lower airways. This solution can be used with pneumatic or ultrasonic nebulisers.

Indications:

No side effects or contraindication have been reported when Hydra-Neb (0.9% NaCl) isotonic solution for inhalation is used as recommended.

Contraindications and side effects:

Use your nebuliser according to the manufacturer's instructions provided with the system.

Pour the inhalation solution into the nebuliser.

Break off a unit-dose vial and open it by twisting off the top.

Preparation for inhalation:

Depending on the need, up to four vials per day can be used (with one vial per inhalation). For information on how to use your nebuliser, refer to the manufacturer's instructions.

Dosage and administration:

Sodium chloride 0.9 g, purified water qs 100 mL, preservative free.

Composition:

Box of 20 unit-dose vials each containing 2.5 mL of solution wrapped in a protective pouch.

Forms and presentations:

Precaution for use:

- Single use only.
- Not for injection.
- Keep out of the reach of children.
- Check that the unit-dose vial has not been damaged prior to use.
- The solution contained in the unit-dose vial must be used immediately after opening - if not, it must be thrown away.
- Do not reuse a unit-dose vial that has already been opened or partially used.
- This product is preservative free so open vials must not be reused to prevent the risk of administering a contaminated solution.
- Do not use the solution after the use-by date indicated on the packaging.
- Store at room temperature.
- Unit-dose vials should be used within 2 months after opening of the pouch.

Hydra-Neb (0.9% NaCl) isotonic solution for inhalation is a Class IIa medical device. Date of CE marking: 26/06/2007.

Explanation of symbols:

Sterilised using aseptic processing techniques.

Single use only.

Please follow the instructions for use.

Use by date.

Manufacturer.
